CAREER OBJECTIVE

Motivated and adaptable individual seeking an entry-level position to develop my skills and contribute to team objectives, while gaining hands-on experience in a fast-paced environment.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE -Data Science	VNR Vignana Jyothi Institute of Engineering and Technology	8.99(8th Semester)	2022-26
Senior Secondary	Pinegrove Junior College	97.4%	2020-22
Secondary	Paramita Heritage School	10.0	2019

EXPERIENCE

AI Intern, Swecha, Meta (Summer of AI Internship) (Remote) May-June 2025

- Completed a 4-week intensive AI internship focused on developing real-world technology solutions for Global South challenges, gaining hands-on experience in Machine Learning workflows, data preprocessing model.

TECHNICAL SKILLS

Programming:	C++, Python, Java
CS Subjects:	Data Structures, Design and Analysis of Algorithms, Object-Oriented Programming (OOP), Computer Networks, Database Management Systems, Operating Systems, Machine Learning
Data Visualization:	Excel, R, Power BI, Tableau
Web Technologies:	HTML, CSS, JavaScript
Soft Skills:	Problem-solving, Team Coordination, Deadline Management, Leadership, Adaptability

PROJECTS

- MobileNet-ConvLSTM Based Intelligent Border Surveillance System** September 2025
Python, Deep Learning, Computer Vision, Node.js, IoT
 - Developed a low-power AI-based spatio-temporal surveillance system for real-time border security using edge devices.
 - Built a hybrid MobileNetV3-ConvLSTM model for spatio-temporal analysis, reducing false alarms.
 - Designed an end-to-end system with edge-level intrusion detection on a Single-board Computer and **GPU-accelerated secondary verification** using super-resolution and ResNet-based bounding box detection via a Node.js server.
- Hostel Daily Pass System-Digital Token Generator** February 2025
HTML, CSS, JavaScript, Local Storage
 - Designed and developed a **web-based digital hostel pass system** using **HTML, CSS, and JavaScript** that generates a unique, time-bound daily access token for each registered hosteller.
 - Implemented **client-side token validation and QR-based verification**, resulting in **zero unauthorized mess access** and significantly improving hostel access control and resource utilization.
 - Post-implementation analysis indicated a **100% reduction in non-hosteller accessing hostel mess facilities**.
- Healthcare Patient Data Aggregation System** August 2024
Python, MySQL, Pandas
 - Built a data pipeline to consolidate patient records from multiple hospital branches into a unified database.
 - Designed schemas, handled missing/duplicate records, and generated insights using SQL.

CERTIFICATIONS

- Advanced SQL**, in the SDG Hackathon conducted by IIIT Hyderabad February 2025
- Power BI essentials**, Training from LinkedIn Learning February 2025
- Principles of Generative AI** – Foundational Course July - October 2024

LEADERSHIP

Design Lead, VJ Data Questers March 2024 -May 2026

- Spearheaded end-to-end visual strategy and team coordination, translating event objectives into consistent, high-impact designs that strengthened brand identity and boosted student engagement.

Volunteer, VNR Student Force April 2023– May 2026

- Actively contributed to community outreach initiatives by coordinating collection, organization, and on-ground distribution

Volunteer, Vignana Jyothi Sahithivanam August 2025 – May 2026

- Executed end-to-end event planning for literary fests, managing on-ground logistics and attendee engagement.

ACHIEVEMENTS

- Finalist**, in the SDG Hackathon conducted by IIIT Hyderabad September 2024
